

AFU

AIR FEEDBACK UNIT

Easy setup, easy air control.

Are you working in a freezing environment? Your cold aisle getting too cold? We have the perfect solution, meet our AFU. The Air Feedback Unit is developed and built in our factory.

With a built in thermometer, which you can set at any temperature, the fan starts blowing hot air from the hot aisle into the cold aisle until the temperature is just right. Simple but very efficient piece of work. Both eco-friendly and super easy to use. Same measurements as an S19 miner, so The Air Feedback Unit fits in any mining rack.

Production capacity

100 per week

Shipping

Anywhere in the world

Price
