

GENSET GENERATOR

Power, secured.

Our gensets are selected to match site integration, compliance with local regulations, combustion type (diesel, hydrogen), preferred brands. Combined with our UPS container, the entire system is engineered for effortless installation and operation.

Like our entire **KONNECT** ecosystem, the generator is housed in a plug-and-play portable enclosure. This can be a custom unit or a standard ISO container. Whether through purchase or rental, Gensets are readily available to meet your power needs. A global network of skilled professionals is ready to provide 24/7 service and support.

KEY FEATURES

- Seamless automatic operation
