

TRAFO

TRANSFORMER

Connecting to any grid.

A tailored containerized solution to connect to any medium voltage electrical grid. It includes switching gear for both the low voltage and high voltage side as well as of course the transformer (TX). Skilled technicians and engineers can take care of all required connections, commissioning and total activation, if so desired. When faced with an emergency, a back-up fleet is available to reduce any downtime.

KEY FEATURES

- ISO shipping container (10-20ft)
- Custom built or from existing fleet
- Divided into different compartments (LV & MV)
- Oil filled transformers, mounted inside an oil leaking protection
- All weather proof cable entry's (plates or bags)

10/20ft container frame

Connections
